WORK EXPERIENCE

BCS Technology International Pty Ltd

React JS Developer

Feb. 2024 – Present

Makati City, Metro Manila, PH

- Manages the upkeep of two projects simultaneously as a solo developer, addressing bugs, implementing new features, and professionally deploying updates across different environments using Azure
- Collaborating closely with clients to understand and meet their expectations, while delivering tailored software solutions with precision and professionalism.
- Ensures code is refactored to align with project requirements, remains updated with React.js standards, and optimizes page functionality to seamlessly handle data requests.

Hooli Software

Software Engineer

Nov. 2022 – Feb. 2024

Marilao, Bulacan, PH

- Contributes to the development and maintenance of three projects, actively participates in developing new features, and proactively addresses critical bugs. Utilizes React JS as the front-end framework and Go as the backend language.
- One of the pioneering developers of a project, meticulously crafting its foundation while embracing Software Design Principles.
- Successfully refactored code to optimize API calls, resulting in a notable improvement in page loading time.
- Closely collaborate with cross-functional teams, namely the design and product team, and mentors software developer interns to achieve improvement in team productivity.
- Consistently delivering project outcomes on time, ensuring successful integration into production environments, and ultimately achieving client satisfaction.

PROJECTS

CUISINA (CookBook Mobile Application)

- An expansive android mobile application, offering categorized recipes with convenient links to associated YouTube videos or web articles.
- Utilizes Java and Kotlin in Android Studio, combining both languages for an efficient and user-friendly mobile experience.

Web Portfolio

- A responsive personal website portfolio, serving as a showcase for highlighting various projects and achievements
- Utilizes HTML, CSS, and Vanilla JavaScript, hosted on Github for easy accessibility and sharing.

EDUCATION

Bulacan State University

Bachelor of Science Major in Computer Engineering

July 2022

Malolos, Bulacan

- Dean's Lister
- Won the best thesis named, "Micro-controller Based Customer Counter With Thermal Imaging And Automatic Doorknob Disinfection For Establishments In Barangay Cutcot, Pulilan, Bulacan"
